FINANCIAL HARDSHIP**

» STATE OF ALICE

INTRODUCING ALICE®

WHO ARE ALICE HOUSEHOLDS?

In 2024, based on the Federal Poverty Level (FPL), 10% of Washington households were defined as being in poverty. Yet this measure did not account for an additional 27% of the state's households — more than twice as many — that were also in financial hardship. These households are **ALICE: Asset Limited, Income Constrained, Employed** — earning above the FPL, but not enough to afford basic expenses in the county where they live.

Combining ALICE households plus those living in poverty, **an estimated 37% of households in Washington were below the ALICE Threshold in 2024** (Figure 1). This rate was lower than the [national average](#) (41%) and placed Washington 14th among all states and the District of Columbia (with 1st representing the lowest rate of hardship).

Households below the ALICE Threshold don't have enough income to afford their basic needs. They are

forced to make impossible choices, like deciding whether to pay for utilities or a tank of gas; whether to buy food or fill a prescription; whether to live close to work and pay more for housing or opt for a longer, more costly commute. And they are less likely to have the resources to cover unexpected household expenses (like an unforeseen car repair or a costly medical bill), or to recover from crises, both widespread (like a natural disaster or public health emergency) and personal (like the loss of a job or family member).

There are households below the ALICE Threshold across demographic groups, living in every state and county in the U.S. These households play a vital role in their communities as neighbors, family members, and civic participants, and they contribute to their local economies as workers, consumers, and taxpayers. Workers in households below the ALICE Threshold perform the jobs that keep our economy functioning smoothly — they are child care providers, food service workers, cashiers, personal care aides, delivery drivers, and more. Yet their own households struggle to afford basics.

There is no single cause — or solution — because all households are unique and the reasons that households face financial hardship are complex and interrelated. Targeted interventions can temporarily help ease challenges like food insecurity or housing cost burden, but improving overall financial stability for the long term requires more comprehensive strategies. Coordinated action is needed across multiple levels — including household supports, community infrastructure, employer practices, and public policy — to address the upstream conditions that contribute to persistent hardship for ALICE households in the state and across the nation.

Figure 1. Thirty-Seven Percent of Washington Households Faced Financial Hardship in 2024
Total State Households: 3,154,247

Sources: ALICE Threshold, 2010–2024; U.S. Census Bureau, American Community Survey, 2024

GETTING AN ACCURATE COUNT: THE ALICE MEASURES

The Federal Poverty Level (FPL) is obsolete. It does not consider the wide variation in cost of living by location (except for a slightly higher state-level FPL for Alaska and Hawai'i), nor has its methodology been updated since it was [formulated in the 1960s](#), despite changing economic conditions. As a result, the official poverty rate sharply underestimates the true extent of financial hardship in the U.S. And because the FPL, or multiples of the FPL, define eligibility for many types of public assistance, ALICE households often do not qualify. In 2024, the FPL was \$15,060 for a single adult and \$31,200 for a family of four.

The ALICE measures, developed by [United For ALICE](#), present a more comprehensive picture of financial hardship by including ALICE households — those with income above the FPL, but below the cost of basics.

The two pillars of the ALICE measures are household costs and income. [The ALICE Household Survival Budget](#) estimates the cost of household basics — housing, child care, food, transportation, health care, and technology, plus taxes — for each county in Washington, derived from a range of [publicly available data sources](#). This is a minimal budget, with no room for emergency expenses, debt payments, or saving for the future. Change over time in the cost of household basics is tracked in the [ALICE Essentials Index](#).

For household income, ALICE measures rely on the U.S. Census Bureau's [American Community Survey](#) (ACS) — both household tabulated data and individual data from the [Public Use Microdata Sample](#) (PUMS) records. Households with income below the Household Survival Budget for their household type and county are **below the ALICE Threshold** — including both households in poverty and ALICE households. **The ALICE Threshold is a more comprehensive measure of financial hardship than the FPL.** It relies on income, household type, and local cost of living to estimate how many households are not earning enough to cover the basics.

The core issue is the gap between household income and what families need to make ends meet. This makes it impossible for many households to attain financial stability, no matter how hard they work. Figure 2 shows the mismatch between costs, wages, and the FPL in 2024. First, it includes ALICE Household Survival Budget costs for a Washington family with two adults, an infant, and a preschooler (totaling \$109,560 annually). Second, it shows the household's combined full-time earnings with one adult in the household working as a cook and the other working as a teller — two common occupations in the state — totaling \$78,580 annually. Finally, the FPL for a family of four is shown (\$31,200, the same amount for all contiguous U.S. states).

Figure 2. Household Survival Budget Costs Exceeded Wages of Common Jobs and the FPL
Family of Four, Washington, 2024

Note: Cooks season and prepare foods in restaurants and other establishments. Tellers process routine transactions, such as cashing checks and depositing money, at a bank or credit union.

Sources: ALICE Household Survival Budget, 2024; Bureau of Labor Statistics—Occupational Employment Statistics, 2024; U.S. Census Bureau, Federal Poverty Measure, 2024

Data Notes: The data included in this Report spans 2010 to 2024 (latest available). This data does not reflect the impact of policy or funding changes that have occurred since 2024, yet it provides an important baseline and context to inform current conversations and decision making. The [income data](#) used in this Report relies on ACS estimates. The ACS is based on a representative sample of housing units and people; therefore, these estimates have a [degree of uncertainty](#). Some data points are geographic averages; others are one- or five-year averages depending on population size (these are reported in the [Data Sheet](#)). Percentages are rounded to whole numbers, sometimes resulting in percentages totaling 99% or 101%.

ALICE Threshold analysis includes all households regardless of work status, as employment is fluid and most households have members who are working, have worked, are out on disability, or are looking for work. This analysis includes families and roommates but does not include people who are unhoused or living in group quarters (such as college residence halls, skilled nursing facilities, and military barracks). State-level population totals are a summation of county-level estimates.

To provide additional details on household assets, this Report also includes analysis of the [Federal Reserve Board's Survey of Household Economics and Decisionmaking](#) (SHED) (2024).

KEY FINDINGS: WASHINGTON, 2024

Financial hardship: Of Washington's 3,154,247 households, 10% (313,142) were below the FPL, and another 27% (856,500) were ALICE — households with income above the FPL, but not enough to afford the ALICE Household Survival Budget for their household composition and location. Combining these two groups, 37% (1,169,642) of households were below the ALICE Threshold. Despite some ups and downs, the number of ALICE households in Washington trended upward overall between 2010 and 2024 while the number of households in poverty remained largely unchanged. Most recently (between 2023 and 2024), the numbers of both ALICE and poverty-level households remained flat.

The cost of basics: In Washington, the ALICE Household Survival Budget was \$34,332 for a single adult and \$109,560 for a family of four with two adults, an infant, and a preschooler — much higher than the FPL (\$15,060 for a single adult and \$31,200 for a family of four). Basic costs varied substantially by county. The annual Household Survival Budget costs for a single adult were highest in Snohomish County and lowest in Ferry County. For a family of four, costs were highest in Pacific County and lowest in Ferry County.

ALICE demographics: There were households below the ALICE Threshold across all Census-reported demographic groups in Washington. And as in every state, some populations experienced higher levels of financial hardship. This reflects both longstanding and ongoing policies and discriminatory practices in areas of work, housing, education, and access to community resources that limit financial stability for many families. In 2024, the groups with the highest percentage of households below the Threshold included Black households (53%), American Indian/Alaska Native households (50%), and Hispanic households (48%); households headed by people under age 25 (64%) and age 65 and over (47%); single-parent-headed households (75% single-female-headed, 52% single-male-headed); and households in rural areas (42%). In Washington, there was also a notable increase over time (2010–2024) in the total number of households headed by someone age 65+, as well as the number of age 65+ households living below the ALICE Threshold.

ALICE in the labor force: Of the 10 largest industry sectors (by total workers), financial hardship was highest in Accommodation and Food Services, with 37% of workers living in households below the ALICE Threshold. By occupation, rates of financial hardship were as high as 73% for Other Agricultural Workers and 49% for Cashiers, two of the most common occupations in the state.

DEFINITIONS

ALICE: Asset Limited, Income Constrained, Employed — households with income above the Federal Poverty Level (FPL) but less than the basic cost of living in their county

ALICE Household Survival Budget: Reflects the minimum costs of household necessities (housing, child care, food, transportation, health care, and technology) plus taxes, adjusted for all U.S. counties and various household compositions

ALICE Threshold: Derived from the Household Survival Budget, the minimum average income that a household needs to afford basic costs, calculated for all U.S. counties

Below ALICE Threshold: Includes households in poverty and ALICE households combined

MEET ALICE: LOIS' STORY

Lois is a loving mother for whom financial trade-offs are a constant reality. As a member of the ALICE Community Advisory Committee, she helps shine a light on the experiences of ALICE households nationwide.

BASIC COSTS: THE ALICE HOUSEHOLD SURVIVAL BUDGET

To capture the reality of household costs across Washington, the **ALICE Household Survival Budget is calculated for all counties and various household compositions**. This budget reflects the minimum cost to live and work in today’s economy (Figure 3). It includes just the basics needed to get by. Not included are things that many families take for granted — eating out, children’s birthday presents, new clothes, or updated appliances. And notably, this budget doesn’t include savings needed to cover unexpected costs, invest, or put toward goals like education, homeownership, or retirement. According to the [Federal Reserve Board’s Survey of Household Economics and Decisionmaking \(SHED\)](#), in the Pacific Census Division (which [includes](#) Washington) only 40% of respondents below the ALICE Threshold reported having emergency savings that could cover three months of expenses, and only 40% had retirement assets in 2024. In comparison, 77% of respondents above the Threshold had emergency savings and 90% had retirement assets.

Because the Household Survival Budget reflects the bare-minimum cost of household basics, many families actually pay more for some expenses, forcing them to cut back or sacrifice somewhere else. This leaves families with impossible choices and tradeoffs and the stress of constantly navigating insufficient funds, on top of working and other household responsibilities.

Housing costs are especially challenging. As rental and homeowner costs increase faster than wages, **households below the ALICE Threshold face substantial [housing cost burden](#)**. In Washington in 2024:

- 75% of all renter households below the Threshold were rent burdened (paying 30% or more of their income on rent and utilities). This included 28% of renter households who paid 30%–49% of their income on rent and utilities, and 47% whose rent costs totaled half of their income or more.
- 57% of homeowner households below the Threshold were housing cost burdened (paying 30% or more of their income on homeowner costs, including mortgage payments, utilities, property taxes, and homeowner’s insurance).

CUSTOM BUDGETS AT YOUR FINGERTIPS

See the [ALICE Budget and Income Status Tool](#) for custom budgets by household composition and location.

Figure 3. The ALICE Household Survival Budget Calculates Basic Costs for Various Household Types

Descriptions, Sources, and Select State-Average Monthly Costs, Washington, 2024

	Budget Item Description and Sources (See Methodology for more details)	Single Adult, Age 18–64	Single Adult, Age 65+	2 Adults, 1 Infant, 1 Preschooler
Housing	110% of Fair Market Rent (FMR) for an efficiency, one-bedroom, or two-bedroom apartment (based on family size), including utilities, adjusted in metro areas using Small Area FMR <i>Source: U.S. Department of Housing and Urban Development (HUD)</i>	\$1,150	\$1,150	\$1,586
Child Care	Cost for registered Family Child Care Homes for infants (0–2 years), preschool-age children (3–4 years), and school-age children (5–17 years) <i>Source: Washington State Department of Children, Youth, and Families</i>	—	—	\$2,794
Food	USDA Thrifty Food Plan by age, with county variation from Feeding America <i>Sources: Feeding America; U.S. Department of Agriculture (USDA)</i>	\$529	\$487	\$1,435

Transportation	Operating costs for a car (average daily miles by age, cost per mile, license, fees, and insurance), or public transportation where viable <i>Sources: AAA, Federal Highway Administration, National Association of Insurance Commissioners (NAIC) (car); Consumer Expenditure Survey (CEX) (public transportation)</i>	\$363	\$305	\$793
Health Care	Health insurance premiums based on employer-sponsored plans plus out-of-pocket costs for households with \$40,000–\$69,999 annual income by age, weighted with the poor health multiplier. For the ALICE 65+ Survival Budget, cost of Medicare Parts A and B, out-of-pocket costs, plus average out-of-pocket spending for the top five chronic diseases as reported by CMS. <i>Sources: Centers for Medicare & Medicaid Services (CMS); CEX (health); Medical Expenditure Panel Survey (MEPS)</i>	\$162	\$494	\$778
Technology	Basic broadband internet at home and a smartphone plan with unlimited data for each adult in a household using average cost of three top major providers (AT&T, Verizon, and T-Mobile) and three top basic (lower-cost) wireless providers (Visible, U.S. Mobile, and Consumer Cellular) <i>Sources: Consumer Reports; Federal Communications Commission (FCC)</i>	\$95	\$95	\$129
Miscellaneous	Cost overruns estimated at 10% of the budget, excluding taxes, to cover one-time unanticipated costs within the other categories	\$230	\$253	\$752
Taxes	Federal payroll taxes (Social Security and Medicare) and federal, state, and local income taxes owed on household income to cover the Survival Budget, as well as the federal and state Child Tax Credit and Child and Dependent Care Tax Credit <i>Sources: Internal Revenue Service; Tax Foundation; calculated for United For ALICE by the Federal Reserve Bank of Atlanta (FRBA)</i>	\$332	\$382	\$863
Monthly Total		\$2,861	\$3,166	\$9,130
Annual Total		\$34,332	\$37,992	\$109,560
*Hourly Full-Time Earnings Needed to Support the Household Survival Budget		\$17.17	\$19.00	\$54.78

*Represents the earnings needed at 40 hours per week, 50 weeks per year to support the annual total, including taxes.

THE EARNED INCOME TAX CREDIT (EITC)

The EITC is a refundable federal tax credit that supports low- to moderate-income workers. Eligibility varies based on income and family composition. Families with children are eligible for the largest credit: In 2024, the [maximum credit for eligible families](#) with three or more qualifying children was \$7,830, compared to \$632 for workers age 25 to 64 without children.

For tax year 2024, [income eligibility](#) for federal EITC ranged from \$18,591 for an individual with no qualifying children to \$66,819 for a married couple with three or more children. The EITC is an effective anti-poverty program for many working families, lifting nearly [4.4 million people](#) above the poverty line in 2024 (based on the [Supplemental Poverty Measure](#)). However, not all ALICE households can benefit. For example, in 2024, 45% of single households and 44% of married-parent households with two children in Washington had income above the federal EITC eligibility cut-off, but below the ALICE Threshold — too much to qualify for the tax credit, but not enough to make ends meet.

In addition to federal EITC, 30 states and the District of Columbia — including Washington — have implemented a [supplemental state EITC](#). Eligibility for state credits typically mirrors the federal EITC qualifications, although not all state credits are refundable.

Benefits of receiving the EITC are far-reaching, with strong links to [improved educational outcomes and future employment](#) and [better self-reported health status](#) among children raised in recipient households. Despite these benefits, approximately [20% of eligible taxpayers in the U.S.](#) do not claim the EITC. [Barriers to participation](#) include not earning enough to file a tax return, lack of awareness, complex rules, administrative burden, language barriers, and distrust of government. States can help [promote the EITC](#) by educating the public about the availability of the credits and targeting outreach to families already enrolled in programs such as SNAP and Medicaid; through Volunteer Income Tax Assistance (VITA) programs; by prefilling and sending tax forms to eligible families; and by requiring employers to share information about the EITC with their employees.

COSTS OVER TIME: THE ALICE ESSENTIALS INDEX

Inflation is a key indicator of the health of the economy. When prices increase faster than wages and other sources of income, purchasing power decreases and households struggle to make ends meet.

The [ALICE Essentials Index](#) measures change over time in the cost of the household essentials that matter most to ALICE and poverty-level households: housing, child care, food, transportation, health care, and basic technology. The standard measure of inflation in the U.S., the Bureau of Labor Statistics' Consumer Price Index (CPI), tracks a much larger basket of [over 200 categories of goods and services](#) — including items that financially insecure households can't afford on a regular basis, like full-service meals at restaurants, wine, major appliances, travel, and jewelry. Tracking costs over time using the CPI alone can conceal important changes in the costs of household essentials.

Nationally, the ALICE Essentials Index has outpaced the broader CPI since 2007. Costs for both measures increased at a faster pace following the pandemic. Between 2021 and 2024, the ALICE Essentials Index increased at an annual rate of 5.6% compared to 5.0% for CPI — both much faster than the annual rates from 2007 to 2019 (2.7% annual increase for the ALICE Essentials Index and 1.8% for CPI).

In Washington, the ALICE Essentials Index also increased faster than the national CPI, as shown in Figure 4. And like the national trend, essential costs in Washington increased at a faster rate following the pandemic (7.1% annual increase in the ALICE Essentials Index from 2021 to 2024, compared to 3.1% between 2007 and 2019).

Figure 4. The Cost of Basics is Increasing Faster Than Overall Inflation

Inflation Indices, Washington and U.S., 2007–2026

Note: Inflation index scores provide a way to summarize complex data and track changes in costs over time using a numeric scale. The baseline for CPI was set at 100 in 1982. Compared to that baseline, CPI reached 207 in 2007, meaning that prices were 107% higher than in 1982. To compare the ALICE Essentials Index to CPI, the ALICE Essentials Index is set to the 2007 CPI value of 207. With this standardization, Figure 4 shows how the change in these two measures compares over time. In the text, keeping with convention, we report the percent change in each index from one year to another. The ALICE Essentials Index rates for 2025 and 2026 are projections. CPI 2026 is preliminary (based on data through February 2026).

Sources: ALICE Essentials Index, 2007–2026; Bureau of Labor Statistics, 2007–2026—CPI

ALICE DEMOGRAPHIC TRENDS

There are households below the ALICE Threshold across Washington, and they reflect a wide range of demographics and household types. In Washington, rates of financial hardship differed substantially across demographic groups.

Trends for ALICE and poverty-level households: Between 2010 and 2024, the total number of households in Washington increased from 2,604,207 to 3,154,247. During this period, despite some ups and downs, the number of ALICE households in Washington trended upward while the number of households in poverty was largely unchanged. Most recently (between 2023 and 2024), the numbers of both ALICE and poverty-level households remained flat (Figure 5).

Trends for households below the ALICE Threshold (ALICE + Poverty): The number of households below the ALICE Threshold has remained high over time (2010–2024), persisting through shifting economic conditions and the COVID–19 pandemic, and across political administrations. Between 2010 and 2024, the number of households below the Threshold in Washington increased from 828,428 to 1,169,642. During this period, the percentage of households below the Threshold in Washington ranged from a high of 38% to a low of 31% (Figure 5). Most recently, the share of financially insecure households remained largely unchanged (37% of all households below the Threshold in 2024, compared to 38% in 2023).

Figure 5. The Number of ALICE Households Trended Upward Over Time While Households in Poverty Held Flat

Number of Households by Income, Washington, 2010–2024

Note: Data years are comparable over time (methodology changes are backdated as necessary for continuity). However, year-to-year changes should be interpreted with caution; multi-year trends are more reliable. The gray dashed trend lines in this figure highlight the general direction of the point-in-time data for the years shown. These lines indicate whether the numbers of ALICE and poverty-level households have been generally increasing, decreasing, or remaining flat/no significant trend. The ALICE trend line is statistically significant at $p < 0.0001$; however, the Poverty trend line is not statistically significant.

Sources: ALICE Threshold, 2010–2024; U.S. Census Bureau, American Community Survey, 2010–2024

Households by age: In 2024, the youngest and oldest households had the highest rates of financial hardship: 64% of households headed by someone below age 25 and 47% of households headed by someone age 65 and over lived below the ALICE Threshold in Washington. By comparison, rates were lower for those in their prime working years, with 32% living below the Threshold for both households headed by people age 25–44 and households headed by those age 45–64 (Figure 6).

With the [aging of the Baby Boomer generation](#), households headed by people age 65 and over were the fastest-growing age group in Washington (up 62% between 2010 and 2024). They were also the age group with the most substantial increase in the number of ALICE households.

Households by race/ethnicity: Rates of financial hardship differed substantially by race/ethnicity in Washington, often reflecting longstanding and ongoing policies and discriminatory practices that restrict access to quality [education](#), [work](#), [housing](#), and other [community resources](#). In 2024:

- The largest number of households below the ALICE Threshold were White (774,003), making up 36% of all White households.
- Hispanic households were the next largest group below the Threshold (152,637), making up 48% of all Hispanic households.
- There were also 123,037 households headed by someone of Two or More Races below the Threshold, making up 42% of all households of Two or More Races, 85,972 Asian households below the Threshold, making up 29% of all Asian households, and 61,391 Black households below the Threshold, making up 53% of all Black households.
- Other, smaller groups also had high rates of hardship: 50% of American Indian/Alaska Native households and 40% of Native Hawaiian/Pacific Islander households were below the Threshold.

Trends in the number of households below the ALICE Threshold by race/ethnicity varied from 2021 to 2024 (longest comparable time series) among the three largest groups. The number of White households below the Threshold increased sharply from 2021 to 2023, and despite falling from 2023 to 2024, increased by nearly 70,000 households overall from 2021 to 2024. By comparison, the number of Asian households and Hispanic households below the Threshold have been steadily inching up year over year since 2021.

Households by member composition: In 2024, 35% of single or cohabiting households without children headed by someone under age 65 — the most common household type — were below the ALICE Threshold in Washington. The total number of these households increased between 2010 and 2024 (up 21%), as did their number below the Threshold, and to a greater extent (up 41%).

Among families with children under age 18, there were disparities in financial hardship by household type: In 2024, 75% of single-female-headed families and 52% of single-male-headed families were below the ALICE Threshold, compared to 17% of married-parent families. In Washington from 2010 to 2024:

- Both the total number of married-parent households and their number below the Threshold increased (up 9% and 18%, respectively).
- The total number of single-female-headed households decreased (down 12%), while their number below the Threshold remained relatively flat.
- Both the total number of single-male-headed households and their number below the Threshold increased (up 18% and 23%, respectively).

Households by location: In 2024, the rate of financial hardship was higher as in the predominantly rural counties of Washington, where 42% of all households were below the ALICE Threshold, compared to 37% in predominantly urban counties.

By county, the percentage of households below the Threshold was highest in Pacific County at 60% and lowest in Kitsap County at 30%. Hardship varied even within counties: For example, in Snohomish County (north of Seattle), the percentage of households below the Threshold ranged from 64% in ZIP code 98204 (Everett) to 19% in ZIP code 98296 (Snohomish).

INTERACTIVE DEMOGRAPHIC AND GEOGRAPHIC DATA

ALICE data is available online by [race/ethnicity](#), [age of householder](#), [household type](#), [county](#), [county subdivision](#), [census designated place](#), [ZIP code](#), and [legislative district](#). See all available geographies and more on the [ALICE Mapping Tool](#).

Figure 6. Financial Hardship Varies Substantially by Demographic Group

Key Demographic Groups, Washington, 2024

	Total	Total Below ALICE Threshold	Percent Below ALICE Threshold	■ Poverty ■ ALICE ■ Above ALICE Threshold		
ALL HOUSEHOLDS	3,154,247	1,169,642	37%	10%	27%	63%

Native Hawaiian/ Pacific Islander	15,074	5,961	40%	6%	33%	60%
Two or More Races	292,425	123,037	42%	7%	35%	58%
White, Non-Hispanic	2,168,787	774,003	36%	6%	29%	64%
HOUSEHOLD TYPE						
Married With Children	587,377	101,417	17%	4%	13%	83%
Single-Female-Headed With Children	146,861	109,571	75%	31%	43%	25%
Single-Male-Headed With Children	67,076	34,740	52%	15%	37%	48%
Single or Cohabiting, Under 65, no Children	1,522,134	533,021	35%	10%	25%	65%
RURAL/URBAN						
Rural	320,750	135,365	42%	14%	28%	58%
Urban	2,833,497	1,034,277	37%	10%	27%	64%

Note: This figure shows demographic groups included in the ACS tabulated dataset and reporting is limited to these categories. The groups shown in this figure are based on head of household and overlap across categories. Within the race/ethnicity category, all racial categories except Two or More Races are for one race alone. Race and ethnicity are overlapping categories; in this Report, the American Indian/Alaska Native, Asian, Black, Native Hawaiian (includes other Pacific Islanders), and Two or More Races groups may include Hispanic households. The White group includes only White, non-Hispanic households. The Hispanic group may include households of any race. Because household poverty data is not available for the American Community Survey's race/ethnicity categories, annual income below \$15,000 is used as a proxy. Counties are defined as rural or urban based on the USDA's designation of metropolitan or non-metropolitan at the census tract level. Counties with 50% or more of the population in metropolitan tracts are designated as urban; those with 50% or more of the population in non-metropolitan tracts are designated as rural.

Sources: ALICE Threshold, 2024; U.S. Census Bureau, American Community Survey, 2024

ALICE IN THE LABOR FORCE

According to the Bureau of Labor Statistics, from 2010 to 2024, the number of workers in Washington grew from 2,693,220 to 3,539,650. Most recently, from January to December 2024, the state gained 44,150 workers. During the same period, the [unemployment rate](#) remained relatively unchanged — only shifting from 4.6% to 4.4%. These rates were higher than the pre-pandemic rate (3.6% in January 2020).

Washington workers face a range of ongoing challenges. The workplace continues to evolve with the incorporation of new technologies, including AI, and the shift to more precarious [work arrangements](#), such as many part-time jobs and hourly employment. These arrangements make it easier for employers to [reduce work hours or cut employment](#) altogether when new technology is adopted, the economy ebbs, or financial priorities change. In addition, with the costs of basics increasing, many jobs in Washington do not pay enough to provide financial stability. In Washington in 2024:

- 41% of full-time workers did not earn enough to afford the ALICE Household Survival Budget for one adult and one school-age child.
- Minimum-wage workers in Washington saw a slight increase in wages to \$16.28 per hour in 2024, up from \$15.74 in 2023.
- A wage of \$20 per hour was not enough to support the ALICE Household Survival Budget for one adult and one school-age child in 100% of Washington counties. (See the [ALICE Wage Tool](#).)

Data on financial hardship among Washington workers shows variations in three cross-cutting areas: industry sector, occupation, and work arrangements.

Industry sector: There are workers below the ALICE Threshold across all [industry sectors](#) in Washington. Among the 10 largest industry sectors, the percentage of workers living in households below the ALICE Threshold varied from 9% in Professional Scientific and Technical Services to 37% in Accommodation and Food Services (Figure 7).

Figure 7. Rates of Financial Hardship Vary by Industry Sector

Industry Sector Employment by ALICE Status, Washington, 2024

Industry Sector	Total Workers	■ Poverty	■ ALICE	■ Above ALICE Threshold
Health Care and Social Assistance	550,321	4%	20%	76%
Retail Trade	446,981	6%	23%	71%
Professional Scientific and Technical Services	423,575	7%		91%
Educational Services	354,560	6%	16%	79%
Manufacturing	346,314		14%	83%
Construction	276,430	4%	22%	74%
Accommodation and Food Services	236,316	9%	28%	64%
Public Administration	204,360		8%	89%
Transportation and Warehousing	191,692	5%	21%	74%
Other Services Except Public Administration	180,564	6%	23%	72%

Note: This table includes wages of full-time workers residing in Washington with income from occupations in the listed sectors. Wages include tips. ALICE Threshold status is determined by comparing workers' total household income to the ALICE Household Survival Budget for their household composition and location.

Sources: ALICE Threshold, 2024; U.S. Census Bureau, American Community Survey, 2024

Common Occupations (Jobs): Many common jobs exist across industry sectors — for example, Customer Service Representatives work in Health Care, Retail Trade, and other fields — so it is also important to look at financial hardship by occupation. In 2024, 26% of workers in the 20 most common occupations in Washington were in households below the ALICE Threshold. Occupations with a substantial share of workers in households below the Threshold included Other Agricultural Workers (73%), Cashiers (49%), and Personal Care Aides (45%).

Figure 8. A Large Share of Workers in the 20 Most Common Occupations are Below the ALICE Threshold

Labor Characteristics, Most Common Occupations, Washington, 2024

Most Common Occupations	Total Workers in Occupation Residing in Washington	Percent of Workers Below ALICE Threshold	Median Hourly Wage
Software Developers	156,034	4%	\$90.30
Driver/Sales Workers and Truck Drivers	80,240	34%	\$29.29
Registered Nurses	76,614	12%	\$48.81
Elementary and Middle School Teachers	67,123	11%	\$41.49
Retail Salespersons	66,854	29%	\$25.38
Customer Service Representatives	66,152	26%	\$27.82
First-Line Supervisors of Retail Sales Workers	64,408	23%	\$32.21
Laborers and Freight, Stock, and Material Movers, Hand	63,222	39%	\$20.30
Cashiers	56,984	49%	\$16.60
Janitors and Building Cleaners	53,102	37%	\$22.45
Teaching Assistants	49,072	33%	\$16.11
Personal Care Aides	48,821	45%	\$21.09
Cooks	47,621	42%	\$18.25
Accountants and Auditors	45,857	9%	\$43.93
Stockers and Order Fillers	40,689	34%	\$21.13
Secretaries and Administrative Assistants, Except Legal, Medical, and Executive	38,882	22%	\$26.85
General and Operations Managers	35,463	12%	\$48.32
Financial Managers	34,520	8%	\$50.76
Other Agricultural Workers	34,281	73%	\$14.64
Construction Managers	34,057	18%	\$57.11

Note: This table includes wages of full-time workers residing in Washington with income from these occupations. Wages include tips. ALICE Threshold status is determined by comparing workers' total household income to the ALICE Household Survival Budget for their household composition and location. Prior iterations of this table used data from the Bureau of Labor Statistics and are not directly comparable.

MORE LABOR FORCE DATA ONLINE

For more data on the labor landscape, industry sectors, and occupations in your state, visit UnitedForALICE.org/Labor-Force/Washington and UnitedForALICE.org/ALICE-EVD.

Work arrangements: In 2024 in Washington, 67% of people in the labor force worked full-time (35+ hours per week, for 50+ weeks). Yet only about 40% of employed people (age 16+) had the security of a [salaried, full-time job](#). The rest relied on [non-standard work arrangements](#) — typically [hourly paid work](#) from one or multiple jobs (including [part-time](#) and [gig work](#)). Hourly and part-time workers are more likely to have fluctuations in income due to [schedule changes and variable hours](#) and they are [less likely to receive benefits](#), such as health insurance, paid time off, family leave, or retirement plans.

Both systemic and personal factors can contribute to this. Many workers want to work full time but struggle to find and secure full-time employment. Others work part time because their hours have been reduced. Still others are unable to work full time due to family responsibilities, being in school or training, or dealing with illness or disability. In Washington in 2024, of people in the labor force, 28% worked part time (compared to 26% nationally). Part-time workers were much more likely to be below the ALICE Threshold than full-time workers (36% vs. 17%).

In addition, 35% of people in Washington (age 16+) were out of the labor force (compared to 36% nationally). This included those who were retired (17%) and those who were out of the labor force for other reasons, such as disability, health issues, caregiving responsibilities, or student status (18%).

EDUCATIONAL ATTAINMENT AND STUDENT LOAN DEBT

In line with [broader research](#), United For ALICE data shows that financial hardship decreases as educational attainment increases. In Washington in 2024, the share of workers below the ALICE Threshold was 46% for those with less than a high school diploma; 31% for those with a high school diploma or GED; 27% for those with some college or an associate degree; and 12% for those with a bachelor's degree or higher.

The cost of higher education puts it out of reach for many ALICE households or requires student loans that have proven to be challenging to repay. The [average federal student loan](#) in Washington in 2024 was \$36,709. According to the 2024 [Federal Reserve Bank's Survey of Household Economics and Decisionmaking](#), the amount of student debt was similar for respondents below and above the ALICE Threshold across the U.S. (due to sample size, state-level data is not available). But that debt was more of a burden for those below the Threshold to repay. In 2024, for 61% of borrowers below the Threshold, debt totaled more than half of their household income (compared to 30% of borrowers above the Threshold). Borrowers below the Threshold were also twice as likely as those above the Threshold to be behind on payments or in collections (26% vs. 13%).

FROM DATA TO ACTION: WE ALL HAVE A ROLE TO PLAY

If all households in Washington had enough income to meet their basic needs, not only would individual families be able to pay their bills and experience greater well-being, but their communities, and the wider economy, would benefit as well. Communities are stronger when families are thriving, allowing resources to shift from crisis spending toward improving quality of life (Figure 9).

Figure 9. Meeting Basic Needs Creates Cascading Benefits for Communities

If households have sufficient income for...	Benefits for ALICE Households	Benefits for the Wider Community
 Safe, Affordable Housing	Improved physical and mental health ; safer housing conditions and reduced stress ; improved educational performance and outcomes for children; greater stability for household members; a means to build wealth and racial equity for homeowners	Expanded and updated housing stock , reduced systemic housing inequities , lower health care costs ; reduced homelessness ; opportunities for jobs and more money spent in local communities
 Quality Child Care and Education	Increased labor force participation, lifetime earnings and retirement security for women ; health benefits for children , school readiness , improved educational attainment and graduation rates ; improved performance in higher education ; higher lifetime earnings	Reduced racial/ethnic inequalities in learning and development ; positive health, education, and economic outcomes for children and families ; stronger community economies ; more homebuyers and higher property values through availability of quality child care
 Adequate Food	Decreased food insecurity leading to improved health (especially for children and adults age 65 and over); decreased likelihood of developmental delays and behavioral problems in school	Lower health care costs ; improved school and workplace productivity; healthier food environment ; less reliance on emergency food services ; greater equity by age , gender , race/ethnicity and immigration status
 Reliable Transportation	Decreased transportation insecurity ; improved access to work/job opportunities , school and child care , health care and social services, food/retail markets , and support systems (friends, family, faith communities)	Improved air quality and reduced gasoline consumption/carbon emissions; increased economic opportunity through returns on investment ; a more diverse labor market ; decreased income disparities ; more integrated neighborhoods
 Quality Health Care	Better mental and physical health (including increased life expectancy); improved access to preventive care ; decreased use of emergency room for non-urgent care ; fewer missed days of work and school ; lower share of income spent on health care	Decreased health care spending and strain on emergency services; reduced racial/ethnic disparities in insurance coverage and access to care ; fewer communicable diseases ; improved workplace productivity ; decreased wealth-health gap ; better outcomes during health crises
 Reliable Technology	Improved access to job opportunities ; expanded access to health information and telemedicine services ; increased job and academic performance	Closing the digital divide in access to technology by income; increased economic development ; greater connectivity that helps reduce disparities and increase opportunities for civic participation
 Savings	Ability to withstand emergencies without impacting long-term financial stability; greater asset accumulation over time (e.g., interest on savings); ability to invest in education, property, or finance a secure retirement)	Less spending on public services to cover basic needs like health care, food, and housing; foundation for community investment and development, and collective progress

WHAT ACTIONS CAN YOU TAKE?

Our vision is a country where ALICE families not only have sufficient income to afford the basics but can also save and invest in their future. It is a country where all households have access to safe, affordable housing; well-paying jobs with benefits; education and training opportunities; safe, high-quality child care programs; comprehensive health services; reliable transportation; equitable financial services and asset building opportunities; and a comprehensive, holistic safety net to support households during times of need. Bringing this vision to fruition will require effort and investment across multiple sectors. While specific policy recommendations are beyond the scope of this Report, the information presented here can help stakeholders contemplate and prioritize which solutions will help ensure economic prosperity for all.

Community members:

- Raise awareness of ALICE through ALICE [news](#) and [videos](#) or [share your experiences](#)
- Follow us at United4ALICE on [Facebook](#), [Instagram](#), and [X](#), and share posts about the true state of financial hardship in your state or community
- [Connect with your local United Way](#) for advocacy, support, and volunteer opportunities

Nonprofits and community organizations:

- Advocate for the continuation of current government datasets (e.g., American Community Survey, Fair Market Rents). Consistent data over time is crucial for informed decision making, effective policy implementation, and accountability.
- Use [UnitedForALICE.org](#) tools, maps, and indicators of well-being for community needs assessments and to prioritize and target funding, programs, and services
- Convene and share the ALICE data with existing and new partners — to advocate and innovate cross-sector strategies and solutions

Employers:

- [Implement strategies](#) that support the well-being and retention of ALICE workers while also boosting engagement, productivity, and the bottom line
- Explore the Federal Reserve Bank of Atlanta [Career Ladder Identifier and Financial Forecaster](#)
- Advocate for community resources that support your employees — from affordable housing to quality child care

Policymakers:

- Explore ALICE by district using the [Legislative District Tool](#)
- Use interactive tools from the Federal Reserve Bank of Atlanta (which use ALICE budgets), including the [Policy Rules Database](#), to better understand the impact of benefits cliffs on ALICE families.
- [Map ALICE by location](#) to pinpoint need and identify gaps in community resources

APPLICATIONS OF THE ALICE DATA

Are you wondering how to get started? Here are some of the many applications of the United For ALICE data, tools, and resources. ALICE data is being used to:

- Guide strategic planning, help prioritize needs, and target community programs and services
- Advocate and inform policy and legislation
- Paint a more accurate picture of financial hardship in your community when applying for funding; use ALICE data to better identify strengths and needs when allocating resources
- Determine eligibility for assistance programs and services
- Build and strengthen partnerships and cross-sector collaboration for collective impact
- Create innovative strategies and shared learning to promote financial stability for ALICE

Learn more: See examples of policies, practices, and programs United For ALICE partners have implemented using ALICE data in the [ALICE in Action](#) database.

NATIONAL COMPARISON: INCOME STATUS, 2024

STATE	RANK <small>(1 = lowest % Below ALICE Threshold)</small>	TOTAL <small>Number of Households</small>	Household Income Status

ABOUT UNITED FOR ALICE AND OUR PARTNERS

Launched in 2009 with a study of financial hardship in one New Jersey county, the nonpartisan [United For ALICE movement](#) has grown to include 41 states and the District of Columbia. The ALICE research shines a spotlight on households facing financial hardship — their strengths as well as the challenges they face. With data, tools, and resources, United For ALICE equips community partners — including United Ways, foundations, government, corporations, and other nonprofits — to build equitable policies and programs that promote financial stability for [ALICE and for all](#).

To create the ALICE Reports, our team of researchers works with [Research Advisory Committees](#) composed of experts from our partner states. This work is guided by our rigorous [methodology](#), which is updated biennially with experts from across our Research Advisory Committees.

Director and Lead Researcher: Stephanie Hoopes, Ph.D.

ALICE Research Team: Andrew Abrahamson; Ashley Anglin, Ph.D.; Catherine Connelly, D.M.H., M.A.; Jessica Fernandez; Victoria Mutuku, M.A.; Bhavyashree Putta, M.S.

The State of ALICE in Washington: 2026 Update on Financial Hardship is brought to you by United Ways of the Pacific Northwest. State sponsors include:
